SUN-COM-ETP-001	v1.0	September 2025	CEO / Board

At Sunsynk, we are committed to conducting our business in an ethical, sustainable, and socially responsible manner. This includes the way in which we procure the goods and services that support our operations.

We apply the following principles to all procurement activity:

- **Integrity and Fairness** – All procurement decisions are made objectively, transparently, and free from undue influence.
- **Legal and Regulatory Compliance** – We and our suppliers must comply with all applicable laws, regulations, and international standards.
- **Human Rights and Labour Standards** – We expect our supply chain to uphold fair working conditions, prohibit child or forced labour, and respect equality, diversity and freedom of association.
- **Environmental Responsibility** – Procurement decisions consider environmental impact, resource efficiency, and sustainability.
- **Anti-Bribery and Corruption** – We do not tolerate bribery, corruption, or improper inducements in any form within our business or our supply chain.

Sunsynk promotes these principles across its global operations and expects all suppliers, contractors, and business partners to share the same commitment.
